EDUCATION

2nd year of Bachelor's in IT (current year) Université Paris-Saclay, IUT Orsay, France	2024- 2025
1st year of Bachelor's in IT Université Paris-Saclay, IUT Orsay, France	2023- 2024
1st year in Computer and Network Engineering Moroccan School of Engineering Sciences (EMSI), Rabat, Morocco	2022- 2023
High School Diploma in Physical Sciences Institut Thomas Edison, Rabat, Morocco	2021/2022

COMPLETED PROJECTS

- Database Design (2023-2024)**
 - Created a database for a beauty salon (conceptual, logical, and physical models, SQL database development).
 - Designed and optimized an Olympic Games database with views, functions, and an analytical dashboard using Jupyter.
- Web Application Development (2024)**
 - Developed a complete web application for participatory democracy using PHP and phpMyAdmin API.
 - Enabled citizen-initiated referendums via an interactive web platform, ensuring full back-end functionality with PHP and database integration using MySQL.
- Multilingual and Full-Stack Development (2023-2024)**
 - Developed a C++ PPM image management application: applied filters, blur effects, and RGB manipulations following specifications using imperative and object-oriented programming.
 - Designed a website in HTML/CSS for a fictional entertainment space (an imaginary school).
 - Created a Java application to manage teams, sessions, and events for the Olympics, featuring an MVC graphical interface and object serialization.
 - Studied microprocessors and generated assembly language using MAG.
- Systems and Networks (2023-2024)**
 - Set up a development workstation and configured a Raspberry Pi server for SysOps, including SSH setup and MariaDB access rights management.
 - Designed and configured a computer network for the Society of Friends of Alexandre Dumas, integrating DHCP, DNS, web, and SSH services.
- Project Management (2023-2024)**
 - Gained expertise in project management tools, including PBS, WBS, PERT, GANTT, and specification drafting.
